Subject: Building Update - April 18, 2008

First floor conference rooms 105-108 remain closed. DGS work to contain and remediate these conference rooms is scheduled to begin this weekend. According to DGS, rooms 110 and 111 will likely reopen for use next week after testing and results are complete. Our consultants continue to conduct air quality tests and monitor the work of DGS and their consultants. As reports are finalized and become available they will be posted to the Building Assessment webpage. As always, more information will be provided to you as it becomes available.
