Subject: Bat Inspection on Wednesday

Last evening, September 17, 2007, 5 bats were seen in the headquarters building at 450 N Street. Four were immediately captured and released. The fifth was captured and taken from the building this morning.

Tomorrow, Wednesday, specialists from United Bat Control will be in the building to inspect and locate a potential point of entry. If an employee brings to your attention a future sighting, immediately contact Processing and Facilities Management at 322-7082. Do not attempt to capture or harm the bat. Bats are an endangered species and are protected.

Thank you for your cooperation. We'll pass along more information as it becomes available.
