Subject: RE: Bat Inspection on Wednesday

Following the capture of five bats in the building, United Bat Control conducted an inspection of the BOE headquarters on Wednesday, September 19, 2007 for areas of possible bat intrusion. After inspecting the penthouse, roof, and the 12th floor, the contractor was unable to locate any possible, obvious, point of entry. The contractor also noticed nothing to indicate that there is a colony of bats living in the building.

If any bats should be seen in the building in the future, please direct staff to notify Processing and Facilities Management at 322-7082. Do not attempt to capture or harm the bat. Bats are an endangered species and are protected.
