

Memorandum

To : Mr. Ramon J. Hirsig
Executive Director

Date : May 7, 2010

From : Robert Ingenito
Research & Statistics Section

Subject : **4-R ACT EQUALIZATION RATIO
May 25, 2010 – CONSENT AGENDA**

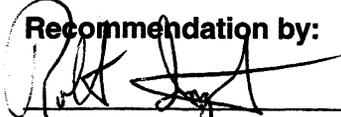

Rail transportation property is to be assessed at the same percentage of market value as all other commercial/industrial property. We have completed an analysis of the effective assessment level of the 2008-09 roll. That analysis, which was based primarily on sales ratio studies using sales data submitted by counties, is summarized on the attached two pages. It yielded an estimated statewide ratio of assessed value to market value of commercial/industrial property other than rail transportation property of 65.14 percent.

Therefore, it is recommended that the Board assess rail transportation property at 65.14 percent of market value for the 2010-11 roll.

ORANGE	57.15%	YUBA	65.32%
PLACER	73.50%		

These ratios were determined primarily by sales ratio studies comparing 2008-09 assessed values to sales prices of properties changing ownership from January 2008 through December 2008. Although these studies when used in aggregate produce a reliable estimate of the statewide ratio of locally assessed C/I real property, the estimate for a single county may vary from year-to-year due to the nature of the particular changes in ownership occurring in a given year.
