

## 1 CALIFORNIA STATE BOARD OF EQUALIZATION

## 2 APPEALS DIVISION SUMMARY FOR BOARD HEARING

3 In the Matter of the Petition for Redetermination )  
 4 Under the Sales and Use Tax Law of: )  
 5 YOHANNES KAHSAI, ) Account Number: SR GH 97-121005  
 dba The Alameda Mini Market ) Case ID 426226  
 6 )  
 7 Petitioner ) Santa Clara, Santa Clara County

8 Type of Business: Convenience store

9 Audit Period: 1/01/04 – 12/31/06

10 <u>Items</u>	<u>Amounts in Dispute</u>	
11 Unreported taxable sales	\$154,444	
12 Negligence penalty	\$ 1,274	
	<u>Tax</u>	<u>Penalty</u>
14 As determined and protested	<u>\$12,741.71</u>	<u>\$1,274.19</u>
15 Proposed tax redetermination	\$12,741.71	
16 Interest through 2/28/09	4,243.16	
16 Penalty	<u>1,274.19</u>	
17 Total tax, interest, and penalty	<u>\$18,259.06</u>	
18 Monthly interest beginning 3/1/09	<u>\$84.94</u>	

## 19 UNRESOLVED ISSUES

20 **Issue 1:** Whether the Sales and Use Tax Department (Department) has accurately computed  
 21 petitioner's taxable sales. We conclude it has and that no adjustments are warranted.

22 During the audit, the Department performed a segregation test of petitioner's purchase invoices  
 23 for the second quarter of 2005 and found that 79.83 percent of the purchases were for taxable  
 24 merchandise. The Department initially applied the taxable ratio of 79.83 percent to the cost of goods  
 25 sold as recorded on petitioner's federal income tax returns (FITR's) and found that the cost of taxable  
 26 goods sold was substantially greater than reported taxable sales. Thus, the Department concluded that  
 27 reported taxable sales were significantly understated. Accordingly, the Department decided to  
 28 compute petitioner's taxable sales using the markup method.

1           The Department performed a shelf test using purchase invoices from March 2007 and selling  
2 prices posted on the shelf or provided orally by petitioner, and computed taxable markups of  
3 29.11 percent for beer, 25.78 percent for soda, 21.76 percent for tobacco products, and 71.31 percent  
4 for miscellaneous taxable merchandise. In computing the markups for beer and soda, the Department  
5 excluded products that had markups exceeding 40 percent. In sum, the Department computed a  
6 weighted markup of 27.86 percent to establish taxable sales. However, rather than use the taxable  
7 merchandise purchase ratio of 79.83 percent obtained from a purchase segregation test of the second  
8 quarter of 2005, in order to be conservative, the Department decided to compute audited taxable cost of  
9 goods sold using the results of the purchase segregation test from the prior audit,<sup>1</sup> which disclosed a  
10 taxable merchandise purchase ratio of 73.04 percent. The Department applied the weighted markup of  
11 27.86 percent to audited cost of taxable goods sold (cost of goods sold as reported on FITR's minus 1  
12 percent for pilferage<sup>2</sup>) and calculated that petitioner had underreported his taxable sales by \$154,444.

13           Petitioner contends that an allowance of 2.4 percent should be made for theft, breakage, and  
14 spoilage, that the markup method should not be used to compute taxable sales and audited taxable sales  
15 should instead be based on cash register tapes, that his bank deposits support reported sales, and that  
16 the weighted markup of 27.86 percent is too high. We note that the audit already includes a 1-percent  
17 adjustment for theft. We recommend no additional adjustment for spoilage and breakage because,  
18 while nontaxable food products could have spoiled prior to being sold, we believe virtually all taxable  
19 merchandise would have been sold by petitioner prior to spoilage and that breakage of taxable  
20 merchandise would have been minor. Additionally, petitioner has provided no documentation to  
21 support his assertion that he discarded significant amounts of taxable merchandise due to spoilage and  
22 breakage.

23           We note that petitioner's daily sales reports appear to have been prepared by using cash register  
24 tapes, and that the sales reports support an understatement of taxable sales of at least \$78,856. In this  
25 case, the audited cost of taxable merchandise greatly exceeds reported taxable sales. In light of this

---

26  
27 <sup>1</sup> The first six months of 2000 were used as a test period for the purchase segregation test in the prior audit for the period  
28 July 1, 1998, to September 30, 2000.

1 strong evidence that reported taxable sales are understated, we conclude that reported taxable sales are  
2 understated, even if reported amounts agree with the amounts recorded on cash register tapes. The  
3 bank deposits also do not support reported sales. Petitioner's bank deposits of \$82,307 for year 2004  
4 were substantially less than reported taxable sales of \$203,463 for the same year. We expect that most  
5 of petitioner's customers paid for merchandise with cash, and it is clear that most of the cash that  
6 petitioner received from customers was not deposited into the business bank account.

7         Petitioner argues that the markup for soda should be about 20 percent (not 25.78 percent), and  
8 that the markup for miscellaneous taxable merchandise should be about 30 to 35 percent (not 71.31  
9 percent). Petitioner has provided no documentation to support this contention. Petitioner notes that  
10 the weighted markup was only 19.12 percent in the prior audit. We find that petitioner's markup  
11 increased since the prior audit. However, neither petitioner nor the Department has provided  
12 documentation to establish precisely when the markup increased. The Department initially computed a  
13 weighted markup of 35.86 percent, but reduced it to 27.86 percent to exclude costs and selling prices  
14 for beer and soda products that had markups in excess of 40 percent. Additionally, the Department  
15 used the prior audit taxable merchandise purchase ratio of 73.04 percent, instead of the 79.83 percent  
16 as calculated in the purchase segregation test for the second quarter of 2005. Accordingly, we find that  
17 the reduction of the markup and the use of the lower taxable merchandise purchase ratio fully account  
18 for the possibility that petitioner's markups may have been lower during the early part of the current  
19 audit period. Thus, we recommend no adjustment to the weighted markup of 27.86 percent.

20         **Issue 2:** Whether petitioner was negligent. We conclude that he was.

21         The Department imposed the negligence penalty because petitioner underreported a large  
22 amount of taxable sales, and similar errors were found in the prior audit for the period July 1, 1998, to  
23 September 30, 2000. Petitioner opposes the penalty because he maintained a complete set of books  
24 and records and believes he was not negligent in reporting his taxes.

25         We note that the Department also used the markup method in the prior audit to compute  
26 petitioner's taxable sales and found that petitioner underreported 48.8 percent of his taxable sales

---

27  
28 <sup>2</sup> The audit work papers indicate that no allowance was made for self consumption because petitioner self consumed an

1 during the prior audit period (an understatement of \$84,930 compared to reported taxable sales of  
2 \$174,065). In the current audit, the Department found that petitioner underreported 60.6 percent of his  
3 taxable sales (an understatement of \$154,444 compared to reported sales of \$254,779). It is clear that  
4 the errors in the current audit are the same types of errors that occurred in the prior audit. Also, the  
5 error ratio of 60.6 percent in the current audit is significantly greater than the prior audit error ratio of  
6 48.8 percent, which indicates that petitioner has not taken any action to improve the accuracy of his  
7 reporting. Additionally, the taxable sales recorded in petitioner's daily sales reports exceed reported  
8 taxable sales by \$78,856 or 31 percent. We would expect petitioner to have been able to accurately  
9 report all of the taxable sales recorded in his own records, especially when considering that he was  
10 previously audited. Finally, the audited taxable merchandise purchases significantly exceed reported  
11 taxable sales. For all these reasons, we find that petitioner was negligent in reporting.

12 **OTHER DEVELOPMENTS**

13 None.
