When are the rates established?

By March 1 of each year, we are required to establish the sales tax, sales tax prepayment and excise tax rates on fuels that will be in effect from July 1 through June 30 of the following year.

How are the sales tax prepayment rates determined?

The prepayment rate for each gallon of gasoline, aircraft jet fuel, and diesel fuel is calculated at 80 percent of the combined state and local sales tax on the average selling price of the fuel, excluding sales tax, as reported by industry publications. We may adjust these rates during the year if changes in fuel prices cause fuel retailers to prepay too much or too little tax. We will notify you if this occurs.

Why are the sales tax and excise tax rates adjusted?

State laws enacted in 2010 created a new tax structure for gasoline and diesel fuels. These laws require us to adjust the excise tax rates by March 1 of each year so that the overall state taxes consumers pay at the pump on a gallon of fuel remain the same as they would have paid under the prior tax structure.
