No. 2024/002

January 24, 2024

TO COUNTY ASSESSORS:

### VALUATION OF CERTIFICATED AIRCRAFT CALIFORNIA STANDARD FLIGHT TIMES

Revenue and Taxation Code<sup>1</sup> section 1153.5 provides that on or before March 1, 2020 and on or before each March 1 thereafter, the Aircraft Advisory Subcommittee of the California Assessors' Association (CAA) shall designate a lead County Assessor's office for each commercial air carrier operating certificated aircraft in California after soliciting input from commercial air carriers in the state (commercial air carriers will be notified of the designation on or before March 15).<sup>2</sup> Each commercial air carrier's property statement for its personal property and fixtures at all airport locations in California is filed with its designated lead County Assessor's office. The lead county calculates an unallocated value of the certificated aircraft and electronically transmits the values to each county where the commercial air carrier has situs.

Pursuant to section 1152, the allocation formula to be used by each County Assessor to value certificated aircraft is the proportionate amount of time, both in the air and on the ground, that certificated aircraft have spent in California during the 12-month period from January 1 through December 31 of the previous year immediately preceding the lien date (January 1), as compared to the total time during that 12-month period. Section 1152 provides the following definitions for the allocation formula:

- *Time in the air* consists of flight time and taxi time within California borders and must be based on the State Board of Equalization's (BOE's) "California Standard Flight Times" table in the most recently published Letter To Assessors (LTA) that addresses intrastate and interstate standard flight times. The standard flight times are multiplied by the number of departures to and from the airports listed in the LTA.
- *Ground time* is all time in California that is not flight time or taxi time. Time on the ground allocated to heavy maintenance that requires a certificated aircraft or scheduled air taxi to be removed from revenue service shall be excluded.

<sup>1</sup> All statutory references are to the Revenue and Taxation Code, unless otherwise provided.

<sup>2</sup> Every third year thereafter, the CAA subcommittee shall redesignate a lead County Assessor's office for each of these air carriers, unless an air carrier and its existing lead County Assessor's office concur to waive this redesignation.

- *Time allocable to each airport* is the amount of time a certificated aircraft or scheduled air taxi is on the ground at the airport, plus the airport's portion of incoming and outgoing flight time.

The attached "California Standard Flight Times" table (Table) provides the intrastate and interstate standard flight times to be used for the 2024-25 fiscal year. The flight times in the table are to be used as the basis for *time in the air* component of the allocation formula, which consists of flight time and taxi time within California borders. Please note that absence of a flight on the attached Table does not preclude the inclusion of that flight in the allocation formula. Commercial air carriers may notify the lead county designated to receive its property statement of any missing flights.

If you have any questions, please contact our County-Assessed Properties Division at 1-916-274-3350.

Sincerely,

/s/ David Yeung

David Yeung  
Deputy Director  
Property Tax Department
