Table 25B
Fuel (Excise) Taxes
DIESEL FUEL AND ALTERNATIVE FUELS STATISTICS,
By Fiscal Year, 1937-38 to 2013-14

NOTE: Detail may not compute to total due to rounding.

Footnotes

- a. Includes interest and penalties which amounted to \$1,173,000 during the 2013-14 fiscal year. This revenue includes self-assessments from tax returns for distributions during the year and, therefore, differs from the figures on Table 2 which are on a modified accrual basis.
- b. Effective January 1, 1996, most interstate motor carriers pay the interstate user tax through the International Fuel Tax Agreement (IFTA) for diesel and use fuel used on the state's roadways. The quarterly IFTA revenue is included in Diesel since the vast majority of IFTA receipts is for diesel fuel use.
- c. Beginning in December 1975, LPG users were allowed to pay tax on a flat rate basis. This treatment has since been extended to other alternative fuels.
- d. These amounts are also included in diesel and alternative fuels revenues.
- e. The IFTA rate was historically set in the fall with a January 1 effective date. The Fuel Tax Swap legislation in 2010 required annual adjustments to the diesel tax rate effective July 1 each year beginning in 2011. Legislation passed in 2012 moved the rate setting for IFTA to July 1 to coincide with the diesel fuel tax rate setting beginning 2013.
- f. The Fuel Tax Swap provides that the retail sale of diesel fuel is subject to additional sales and use tax. The additional sales and use tax rate for diesel fuel is 1.87% effective July 1, 2011, 1.94% effective July 1, 2013, and 1.75% effective July 1, 2014, and thereafter. Additionally, beginning July 1, 2011, the Fuel Tax Swap provides that the state excise tax on diesel fuel be decreased by 5 cents per gallon resulting in a state diesel fuel excise tax rate of 13 cents per gallon. Effective July 1, 2012, the state excise tax on diesel fuel decreased by 3 cents to a rate of 10 cents per gallon.
- g. Effective January 1, 1998, an additional per-gallon surcharge equivalent to the combined local and sales tax rate was imposed on fuel subject to the interstate user tax.
- h. Effective July 1, 1995, under the new Diesel Fuel Tax Law, excise tax on diesel fuel is collected separately from use fuels, and the point of collection is moved from the wholesale level to the terminal rack level.
- i. Effective January 1, 1992, most use fuel tax became collectable by wholesalers of fuel. This change in the point of collection caused use fuel tax to be collected on more fuel than was actually used during the year.
- j. Effective August 1, 1990, the tax rate was increased to 14 cents per gallon.
- k. A special one-cent levy was in effect from June 1, 1969, through August 31, 1969, to raise funds to repair and restore storm- and flood-damaged roads. This levy raised \$450,000 from distributions during the 1968-69 fiscal year and \$837,000 during the 1969-70 fiscal year.
- l. Effective July 1, 1968, the tax rate on most fuel consumed by municipal transit districts was reduced to one cent per gallon.
- m. A special one-cent levy was in effect from April 1, 1965, through August 31, 1965, to raise funds to repair and restore storm- and flood-damaged roads. This levy raised a total of \$1,786,000.
- n. Effective October 1, 1963, the tax rate on liquefied petroleum gases was increased from 6 cents to 7 cents per gallon. Effective January 1, 1966, the tax rate was decreased to 6 cents per gallon.
- o. Effective October 1, 1959, users and vendors of liquefied petroleum gases were required to report under the Use Fuel Tax Law. Prior to this date, they reported under the Motor Vehicle Fuel License Tax Law.
- p. This tax became effective July 1, 1937, at a rate of 3 cents per gallon on diesel and other fuels not subject to the motor vehicle fuel tax.
