## **Building Update - Wastewater Pipe System Investigation - 24<sup>th</sup> Floor Men's Restroom**

On Friday, April 26, 2013, at 7:00 p.m. the Department of General Services (DGS) will inspect the wastewater pipe system located in the men's restroom on the 24<sup>th</sup> floor at the Board of Equalization (BOE) headquarters building (450 N Street). As a precautionary measure, the DGS will construct a containment in the restroom while it is temporarily out of service. All clearances and air sample results associated with the inspection will be posted on the BOE HQ Building Assessment website. DGS has indicated the 24<sup>th</sup> floor men's restroom will return to service on Monday, April 29.

BOE's industrial hygiene consultant, Hygiene Technologies Inc. (HTI), will monitor all DGS investigation activities in conjunction with their contractors.

DGS is inspecting the wastewater pipe system to determine the cause of corrosion and will develop a plan to correct the issue.

Once an action plan has been developed, more information will be provided.

Thank you,

Liz Houser
