**Subject:** Building Update - Scaffolding Replacement at 450 N Street

After 6:00 p.m. on August 15, 2014, the Department of General Services (DGS) will be replacing the rented scaffolding surrounding the perimeter at the Board of Equalization's (BOE) 450 N Street building. The replacement of the scaffolding is required due to the expiration of the contract with the previous fencing vendor. The rented scaffolding will be replaced by scaffolding purchased by the state.

The replacement of the scaffolding will have no impact on BOE operations, including any overtime scheduled for that weekend. Please note that the main "N" and 5th street entrances to the building will not be available during the installation of the new scaffolding. Staff entering or exiting the building during this three-day period will be required to use the entrances on the corner of 5th & "O" Streets and 4th Street. You can also enter the building through the second and third floors of the parking garage; however, no access will be permitted from the garage roof into the building. The DGS and their contractors will complete all scaffolding replacement work on Sunday, August 17, 2014.

We apologize for any inconvenience this may cause. Thank you for your patience and understanding.

Edna B. Murphy, MBA  
Deputy Director, Administration Department  
Board of Equalization
