

**December 2007 TIB**

## **E-filing News!**

More options are now available for e-filing on the Board's own free e-filing site, BOE-file. You now have the option to use the code we assign you to e-file your return or submit your prepayment. You can bypass the e-client registration and just get the return filed. You still need to register to be able to use the other features such as viewing your previously e-filed returns and prepayments.

If you don't feel comfortable using your banking or credit card information over the Internet, we have another new option for you. You may e-file your return/prepayment, print a voucher and mail the voucher to us along with your check.

If you are paying your e-filed return or prepayment by credit card, remember to complete the return/prepayment information first. On the file and pay page, choose "credit card" as your payment option. You will be automatically directed to the credit card processor's website to enter your credit card information. Once that's complete, you will receive a payment confirmation number. You must then return to the Board's website to complete the e-filing of your return/prepayment. Once your return/prepayment has been submitted successfully, you will receive a filing confirmation number. Retain both of those confirmation numbers for your records.
