Product Type:

Accountable—Product is only applicable to terminal operators and petroleum carriers; includes products that are neither motor vehicle fuel nor diesel fuel.

Diesel—Product is any liquid that is commonly or commercially known or sold as a fuel that is suitable for use in a diesel powered highway vehicle; includes biodiesel.

MVF—Product is gasoline and aviation gasoline; gasoline includes both finished gasoline and gasoline blendstocks and gasohol.

Jet—Product is aircraft jet fuel; any inflammable liquid which is used to or sold for use in propelling aircraft operated by a jet or turbine-type engine.

Product Reporting—all products must be reported by terminal operators and petroleum carriers. The following grouping also applies to motor vehicle fuel suppliers, diesel fuel suppliers, aircraft jet fuel dealers, train operators, exempt bus operators, and diesel fuel claimants.

Taxable—Includes motor vehicle fuel, diesel fuel, and aircraft jet fuel sold by aircraft jet fuel dealers. All products must be reported on the applicable tax form.

Reportable—Restricted to suppliers, terminal operators, and petroleum carriers. All products must be reported on the applicable tax form, even though they are not taxable. Reportable products include, but are not limited to, aircraft jet fuel (when not reported by an aircraft jet fuel dealer), ethanol, and kerosene.

Other—Includes products that are only reportable by suppliers when blended with gasoline or diesel fuel or when they are labeled for sale or sold as diesel fuel or gasoline. All products must be reported by terminal operators and petroleum carriers on the applicable tax form.

Exempt—Restricted to dyed diesel fuel product codes. All products must be reported on the applicable tax form, even though they are exempt. The term “exempt” applies to the sales and purchases of the product, not its use. Use of these products on-highway is taxable, but may not be allowable by law.
